Dear Stakeholder,

In 2006/2007, after an extensive analysis of the options, a committee chaired by the Deputy Vice Chancellor (Research and Innovation) selected a software package from a US based company, InfoEd, to provide a corporate environment for the ongoing management of research and compliance. The package is currently installed at the University of New South Wales and the University of Newcastle, and has been selected by the University of Sydney.

The web based package provides a range of modules and facilities for the management and reporting of research and compliance related information. A project team has been formed with a brief to implement the modules of the system over the next two years.

A web page with details of the project's progress and personnel is available at http://www.research.uwa.edu.au/welcome/research_services/research_management_system_project. This web page can be reached via the Research Services web page.

During the implementation of the package the project team will be requesting interested staff to register to participate in Stakeholder Reference Groups to provide guidance in the features that are to be implemented. Any staff interested in participating in the Stakeholder Reference Groups or seeking further information about the project should contact erm-communications@uwa.edu.au.

Yours sincerely

Dr Campbell Thomson
Director, Research Services
